EUROMED TRANSPORT: SUPPORT TO THE MENA ROAD SAFETY PROGRAMME

DETAILED PROJECT DESCRIPTION

This project is being implemented in Lebanon and eight Southern Mediterranean countries as part of the EURONED – MENA Road Safety Programme.

Its main objective is to build the capacity of key stakeholders in road safety and provide the necessary technical assistance to guide the planning, implementation, and evaluation of road safety programs.

The goal is to identify major issues related to road safety conditions and propose a plan of low-cost measures that can be implemented within a limited timeframe. The project section begins at the Antelias entrance and ends at the Baachta-Rihani interchange in Amchit, covering a distance of 30 km.

SERVICES PROVIDED

- Field surveys, data collection and analysis
- Assessment of the current situation in accordance with a comprehensive approach
- Proposing actions and measures to improve road safety conditions along the chosen pilot project.
