TRANSPORTATION MASTER PLAN FOR TRIPOLI

DETAILED PROJECT DESCRIPTION

Organization and analysis of the traffic and parking surveys. Analysis of current conditions (traffic, parking supply and demand, public transport, trips to schools and universities, commodities and industries, etc.).

Traffic modelling of baseline scenario and forecasts. Air quality and noise impact assessments were also used in the evaluation of scenarios.

SERVICES PROVIDED

- Organization and follow-up of the site survey
- Results analysis including traffic modeling
- Recommendations for Tripoli Master Plan
