OCTOBER 2017 - FEBRUARY 2018
 TECHNICAL ASSISTANCE FOR THE CONSTRUCTION OF THIES-TOUBA TOLL HIGHWAY

DETAILED PROJECT DESCRIPTION

The AIBD-Mbour and AIBD-Ngabou sections in Senegal represent a strategic initiative. These sections will connect key economic centers across the country, thereby fostering the development of various productive sectors and promoting organized territorial development. Additionally, the AIBD-Mbour and AIBD-Ngabou sections would enhance accessibility to Blaise Diagne International Airport (AIBD).

A traffic macro-modelling analysis was conducted, exploring several scenarios, including sensitivity analyses for tariffs and revenues

SERVICES PROVIDED

- Traffic model calibration for different modes.
- Road network modeling and demand analysis for 5 future horizons.
- Pricing study for the different modes and pricing sensitivity tests on the sections of the motorways in question.
- Income and revenue analysis
- Preparation of results for economic and financial studies.
